# Capital Parts Inspection

---

- Perform on-site inspections before, during, or after outages
- Inspection identifies existing or potential supplier quality issues (Red Flags)
  - A Red Flag indicates a potentially serious issue warranting further investigation
- Evaluate safety, value, and functionality concerns
- Assess usability and compatibility of parts

# Why Parts Inspection?

---

- Safety compliance and hazard reduction.
- Improved reliability and minimized downtime.
- Assurance of regulatory compliance.
- Insurance requirement compliance.
- Effective risk management.
- Maintenance planning for asset longevity.
- Comprehensive documentation and reporting.
- Peace of mind for operational integrity.

# Top Five Inspection Findings

---

1. Safety hazards or violations
2. Equipment malfunction or failure
3. Environmental concerns
4. Lack of proper documentation or record-keeping
5. Poor maintenance practices

# About Our Inspectors

---

## Who We Are

Qualified industrial turbine equipment inspectors possessing a combination of education, training, skills, and experience to effectively assess and evaluate industrial equipment

## What We Bring

- Training/Experience
  - Design, Analysis, Manufacturing, Repair, Testing on Industrial Gas Turbine Equipment
- Education
- Communication Skills
- Compliance Knowledge
- Adaptability
- Professionalism

**Jupiter Power**  
Engineering Services

# Thank you

---

Let us be a part of your risk mitigation plan.  
We look forward to working together.
